

# Kids + Germs

## A DAYCARE DILEMMA

Kids put their hands everywhere – then they put their hands everywhere else! By the end of the day, everyone has touched everything and everyone.

No matter how hard you try... how hard you scrub... and how many harsh disinfectants you use, it seems you can't keep up or reach every surface.

Wouldn't it be great if you could just push a button and disinfect every surface – every fabric – and all the carpeting?

Well, WE CAN!

We're **Patriot Ozone**. Our industrial-strength ozone generators can treat a room in one hour, destroying pathogens on every surface and even within fabrics.

Ozone is a proven, effective means of disinfection. Studies demonstrate it (we'll show you the studies!).

*No chemicals – No scrubbing – No harsh odors – Environmentally friendly – Use the room within one hour after treatment – Peace of mind*

Most rooms treated in 60 minutes or less. We can work after hours so your business isn't interrupted.

*Licensed – Insured – Professional – Affordable*

**Call us today to set up an appointment!**

We'll give you a free estimate... answer any questions... and show you how we can bring your daycare center to a much higher level of cleanliness at very affordable rates. We're based in Cary, NC
